

EQUIPMENT. SUPPLY. OPTIMIZATION.

Global Reach, Local Accountability

CUTTING EDGE. COST EFFECTIVE. RELIABLE.

RaamCore stands at the forefront of purpose-built conveying systems & industrial equipment to the mining sector

We offer a global perspective for design specification and sourcing with local accountability for implementation and operation. The conveyor and equipment experts at RaamCore apply their decades of high-capacity materials management experience and global sourcing reach to design, specify, implement, optimize and maintain the systems you need to meet the objectives that drive you.

We specify and build using the best, operationally-prescribed materials and build beyond-compliance and with intelligent design to ensure that the custom solutions that we provide operate at both the highest level of safety, throughput and efficiency. From design to delivery, we are your on-site, 'boot-on-the-ground' expert for the provisioning and optimizations of mission-critical systems and equipment you need to realize the full potential and value for your operation.

UNIQUE APPROACH. SINGULAR PHILOSOPHY.

Global Vision. Local Precision

We provide solutions and systems tailored to the genuine operational requirements of stakeholders throughout the value chain

We know, from experience, that complete and comprehensive bulk material handling solutions are not just equipment – but a mission critical part of the project value chain. At RaamCore we combine over half of century of industry experience to plan, source and deliver cutting-edge, reliable, and cost-effective equipment and services that are designed to individual requirements, specifications and objectives – of each and every individual project. From design to delivery, we are your on-site, dedicated expert for the mission-critical systems and equipment you need to realize the full potential and value for your operation.

_01 DESIGN > **_02 IMPLEMENT** > **_03 OPTIMIZE** > **_04 REPEAT**

Design

Intelligent design drives optimal equipment solutions; our 'boots-on-the-ground' and experience and collaborative approach fuels the masterful design of tailor-made equipment solutions that fit your project - and objectives.

Implement

We define 'taking delivery' differently; unlike other industry providers, our work does not end when the equipment is delivered as we are a truly turn-key provider that works with you to install, test and configure everything that we deliver.

Optimize

Applying continuous improvement, continuously; we believe that optimization is a continuous process that requires the application of active management and oversight in when seeking to achieve maximum efficiency and value.

Repeat

Experience is earned through consistent repetition; we know that we are only as good as our last project and are never complacent or stand on our record – every project is unique and that drives our approach seeking to replicate the success but not always the solution.

WE SPECIFY AND BUILD USING THE BEST, OPERATIONALLY-PREScribed MATERIALS AND BUILD BEYOND-COMPLIANCE AND WITH INTELLIGENT DESIGN TO ENSURE THAT THE CUSTOM SOLUTIONS THAT WE PROVIDE OPERATE AT BOTH THE HIGHEST LEVEL OF SAFETY, THROUGHPUT AND EFFICIENCY.

CUTTING EDGE. COST EFFECTIVE. RELIABLE.

Purpose-Built Equipment

Belt Conveyors

Raamcore's custom specified & sourced Belt Conveyors are feature-rich, extensible & purpose-built for your unique operation - & your objectives.

Screw Conveyors

Our screw conveyor solutions for bulk material handling offer not just the capacity you need today - but the versatility to match your needs tomorrow.

Bucket Elevators

Our purpose-built Bucket Elevators are designed by experience and manufactured for reliability, uptime and material capacity.

RESIDUAL EQUIPMENT LIFE MANAGEMENT - RELM

IN THE MINING INDUSTRY, OPTIMIZATION IS THE EFFICIENT OPERATION, MANAGEMENT & MAINTENANCE OF EQUIPMENT THAT IS CENTRAL IN MAXIMIZING PRODUCTIVITY. UNDERSTANDING & ACTIVELY MANAGING RESIDUAL EQUIPMENT LIFE IS NOT A MERE ACADEMIC EXERCISE; IT IS NOW A STRATEGIC IMPERATIVE & OPERATIONAL DISCIPLINE THAT IMPACTS THE ENTIRE BALANCE SHEET. ENTER RELM; AN ACTIVE, ON-SITE PROFESSIONAL SERVICES DISCIPLINE BY RAAMCORE.
